Search Quiz
RMIT University

[quiz starts - 6 questions, multiple choice]

1. All search engines, such as Google, Bing and Baidu (China), produce the same search results.
   A. True
   B. False

2. Why should you access Google Scholar using your RMIT login?
   A. To get better search results
   B. To access the full-text publisher resources.
   C. To limit your search to RMIT Library’s collection
   D. To get broader search results

3. It’s a good idea to search databases as well as LibrarySearch because
   A. LibrarySearch only covers print resources.
   B. LibrarySearch is only relevant to students studying in Australia.
   C. LibrarySearch does not cover all the Library’s resources.
   D. LibrarySearch only works if you’re in campus.

4. To locate a print book in the Library you need to know the…?
   A. Barcode number.
   B. ISBN.
   C. Call number.
   D. Subject code.

5. Complete the sentence below.
   ________________________ can help you find databases and other resources relevant to your subject area.
   A. Subject Guides
   B. Google Scholar
   C. Google
   D. LibrarySearch

6. Which Boolean operator would you choose if you want to find articles containing the following keywords:
   • social media
   • youth
Figure 1: A venn diagram for Boolean search.

A. AND
B. OR
C. NOT

[answers]

1. B False. Search engines have different ways of indexing and ranking which can produce different results for the same search.
2. B. If you access Google Scholar from the RMIT Library website, the results will lead you to full-text publisher resources held by the Library.
3. C.
4. C. Use the call number to locate a book in the library.
5. A. The Subject Guides is the best place to find relevant resources for your subject area.
6. A. Using AND as a boolean operator will help you find articles that are about social media AND youth.
